

AMT 110: Non-Metallic Structures and Welding

This course is a study of repairs to non-metallic aircraft surfaces and structures. Emphasis is placed on repairs to fabric surfaces and to wood, and composite structures. Upon completion, students should be able to repair fabric surfaces and apply finishing materials, make repairs to wood structures, layout and form composite repairs, and inspect/repair non-metallic components (windows, upholstery).

Credits: 5

Lab Hours: 6

Lecture Hours: 2

Prerequisites:
