

# VET 126: Animal Diseases and Immunology

This course is designed to acquaint the student with the importance and transmissibility of common animal diseases and with immunological principles involved in prophylaxis, treatment, and recovery. Topics of study may include but are not limited to: the aspects of the immune response that affect immunization and diagnosis; and familiarizing the student with the common infectious diseases and immunization schedules of domestic animals. Upon course completion, the student should be able to communicate with clients regarding preventable diseases and zoonotic implications and should also be able to assist with formulation of immunization schedules for various species of animals.

Credit Hours: 3

Lecture: 3

Lab: 0

Clinical/Practicum: 0

**Credits:** 3
