

VET 244: Review in Veterinary Technology

This course is designed to review critical topics covered during the two years of the veterinary technology curriculum along with review questions and tests associated with these topics to prepare students for professional licensing exams and employment. Topics may include but are not limited to review in anatomy and physiology, pharmacy and pharmacology, surgical nursing, dentistry, laboratory procedures, animal care and nursing, diagnostic imaging, anesthesia, emergency medicine and critical care, pain management/analgesia, and communication and veterinary professional support services. Students will also receive instruction on post-graduation skills necessary in the areas of personal and professional development for employment and career satisfaction. Upon course completion, the student should be prepared for the Veterinary Technician National Exam, securing gainful employment as a veterinary technician, and contributing to the elevation and advancement of the veterinary profession.
