

AMT 103: Weight and Balance, Ground Handling and Servicing, Cleaning and Corrosion Control

This course introduces basic information necessary for entering students in aviation maintenance technology. Emphasis is placed on aircraft weight and balance, handling and securing aircraft, cleaning and corrosion control. Upon completion, students should be able to conduct aircraft weight and balance, compute aircraft weight and balance, handle and secure aircraft during ground operations, and cleaning and corrosion control.

Credits: 5

Lab Hours: 4

Lecture Hours: 3

Prerequisites:

None

Co-Requisites:

None
