

WELDING TECHNOLOGY

Certificate

Program Locations: The Academy at Fairhope Airport, Atmore, Monroeville, South Baldwin Center for Technology, and Thomasville Campuses

Length: Four Semesters

The Certificate in Welding Technology is designed to prepare individuals for employment in the field of welding. The program is competency based that includes both theory and hands on practical application based instruction. Instruction is provided in various processes and techniques of welding and cutting different types of materials.

This is a career program designed for students to go directly into the labor market upon completion. Although some of the courses in this program will transfer to four-year institutions, this program is not designed to be a transfer program of study; therefore, it is not subject to the terms and conditions of STARS.
