

# Identification of Campus Security Authority Personnel

Who is Campus Safety Authority (CSA)? A campus security authority is defined as any administrator or staff person who has responsibility for a student or campus activity outside of the classroom including campus security officers, athletic coaches, professional staff, and staff advisors in student clubs and organizations.

Who is not a campus safety authority CSA? A faculty member or instructor who does not have responsibility for a student or campus activity beyond the classroom is not a CSA. The following positions are also not considered campus safety authority: clerical staff, bookstore staff, facilities or maintenance staff.
