

BUC 112: Construction Measurements and Calculations

NOTE: There is an approved standardized plan-of-instruction for this course.

This course focuses on the mathematics and calculations used in building construction. Topics include direct and computed measurements and practical applications of mathematical formulas. Upon completion, students should be able to apply measurement and mathematical formulas used in building construction.

Credits: 3

Lab Hours: 0

Lecture Hours: 3

Prerequisites:

As determined by college

Co-Requisites:

As determined by college
