

CAP 222: Specialization Field

This course furthers the study of a particular field (modeling or animation) chosen by the student. Topics include (for modeling) digital sculpting, further anatomical study, understanding of muscle, fat and bone structure. Topics for animation include, learning of motion capture software, roto-capture and animation projects. Upon completion, the student should be able to showcase a deeper understanding of their chosen field.

Credits: 3

Lab Hours: 4

Lecture Hours: 1
